EDUCATION

University of Southern California | May 2028

Bachelor of Science in Computer Science & Business Administration

Honors & Awards: Botswana Top Achievers Scholar (Full ride due to academic performance)

Relevant Coursework: Data Structures, Programming in Python, Statistics & Data Science for Business

PROFESSIONAL EXPERIENCE

University of Southern California | Los Angeles, CA

SEPT 2025 – PRESENT

ITS Student Worker

- Troubleshoot and resolve technical issues for university staff across 303 departments
- Manage a resource reservation system in a 24-hour library, ensuring seamless service to students

FinSentinal | Los Angeles, CA

AUG 2025 – OCT 2025

Algorithmic Trading Intern

- Developed systematic trading strategies by conducting quantitative analysis on historical market data
- Implemented risk management frameworks using Python and financial data analysis

Trojan Sports Research Lab | Los Angeles, CA

JULY 2025 – PRESENT

Research Assistant

- Collaborating with Dr. Lorena Martin on various sports-related data science projects
- Collecting, cleaning and processing large datasets to prepare data for model training and analysis

USC Annenberg Media | Los Angeles, CA

JAN 2025 – MAY 2025

UI/UX, Web Development Team Intern

- Managed the Annenberg Media website and ensured interactive functionality of any additional elements
- Led Implementation and successful implementation of products created by other teams for the website

LEADERSHIP AND ACTIVITIES

National Society of Black Engineers | Los Angeles, CA

AUG 2024 – PRESENT

Member

- Mentoring a first-year computer science student, offering guidance on course selection, resume development, and networking strategies to navigate their academic and professional path

USC Consulting Consortium | Los Angeles, CA

JAN 2025 – PRESENT

Member

- Competed in a case competition in a four-man team and placed 3rd out of 12 teams
- Utilized the three financial statements to provide financial analysis to advise and present courses of action

ColorStack USC | Los Angeles, CA

JAN 2025 – PRESENT

Member

- Engaged in technical workshops focused on building and refining coding projects

PROJECTS

Price Estimation Analysis | *Python, Scikit-Learn, Pandas*

MAY 2025

- Developed and implemented a linear regression model to predict natural gas prices based on past data
- Used pandas to analyze datasets and data scaling methods to normalize inputs, to ensure model accuracy
- Created data visualizations using Matplotlib to evaluate model performance and summarize findings

Pokémon Clash Project | *Python, Pandas*

APRIL 2025

- Engineered an interactive, object-oriented Pokémon game in Python, implementing strategic gameplay mechanics and efficient data management for all 151 original Pokémon.
- Developed algorithms to manage user interactions, application states, and outcome decisions efficiently
- Built a structured project architecture with clearly defined modules for readability and maintainability

SKILLS & INTERESTS

Programming Languages: Python (4 years), R (2 years), C++ (2 years), SQL (2 years)

Frameworks: Matplotlib, Pandas, Scikit-Learn, Tidyverse, Moderndive

Tools: Docker, Microsoft Office Suite

Competitions: Consulting Consortium X RISE Case Competition

Interests: Poetry, Music, Soccer, Basketball, Artificial Intelligence and Machine Learning
